

## PHARMA INTERVIEW

**Mr. Krishan Pal Singh**  
**General Manager,**  
**DCM (API),**  
**Ropar, Punjab, India**

**Question:** Where you see the Indian pharma industry in 2020.

**Answer:** At top of the Industry index like Auto sector.

**Question:** Did pharmacy industry is really helpful to Indian pharmacy student.

**Answer:** Some how (about 50%).

**Question:** What qualities are lacks in the today's pharmacy student.

**Answer:** Practical knowledge (process, modern instruments & operation techniques, QBD aspect of instruments, data analysis & interpretation) is missing which is essential requirement for the Pharma Company.

**Question:** What you want more in pharmacy student in qualification.

**Answer:** More practical training to be added in syllabus and tie-up to be made with Pharma Industry actually what type of qualities required by Pharma Industrialists. They should know about the stastical techniques and interpretations (molecular biology, Bio -genetics shall be added advantage).

**Question:** In health management team place of pharmacy student and its role.

**Answer:** Pharma students can play a vital role in health management team and it should be in II line command after Doctor (more occupation training shall be provided and trained them accordingly to role position).

**Question:** What are the future courses for B.PHARM student?

**Answer:** Bio-genetics and Bio-informatics, molecular nanotechnology, Ultra modern techniques (equipments and Instruments).

**Question:** What is your opinion for education-industry interaction?

**Answer:** Pharmacy colleges tie up with Pharma industry and study the present need (presently no college is being much more interactions with pharma Industry which type of man power required for the future or present jobs, so bilateral dialogue is must for both.

**Question:** Are you happy with the role of pharmacists in the society? What is your advice for pharmacists?

**Answer:** Some how, due to lack of training Pharmacist are not being played their roles to society; also money (pay of Pharmacist) is very less in this sector.

**Question:** In your opinion what is the main problem of a pharma student in getting job.

**Answer:** Lack of practical knowledge, communication skill, handling of modern instruments & data interpretation.

**Question:** What are the career options for a pharmacist in abroad?

**Answer:** Not very good as most of the MNC,s ( pharma companies) shifting their business to India and China.

**Question:** What is the scope for a student in pharma industry?

**Answer:** Very good future as generics patents is being going to expired by the year 2012, so India will be hub for Pharma Industry. This is a right time to enter in pharma field, either in industry or academic.

**Question:** Did you think Indian govt. does not favor the pharmacy peoples but only industry.

**Answer:** No, Indian government is favoring both the way but we are not taking their benefits due to lack of knowledge More interaction is required from both the side to understand the needs.
